

AKIB VIJAPURA

Full Stack Software Engineer

✉ akibv93@gmail.com 📞 +91 7487846936 📍 Bengaluru, In 🔗 [linkedin.com/in/Akib-Vijapura](https://www.linkedin.com/in/Akib-Vijapura) 🐙 github.com/Akib-Vijapura

PROFESSIONAL SUMMARY

Full Stack Software Engineer with 1.5+ years of experience designing and building scalable, high-performance web applications using the MERN stack. Strong expertise in developing RESTful APIs, dynamic front-end architectures, real-time systems, and distributed processing workflows. Experienced in optimizing database performance, implementing secure authentication systems (JWT, RBAC), and building fault-tolerant backend services. Passionate about writing clean, maintainable code and delivering production-grade solutions in fast-paced environments.

EXPERIENCE

Juntrax Solutions Pvt. Ltd. [🔗](#), Software Development Engineer 1
09/2024 – Present | Bengaluru, India

- Designed, developed, and maintained a scalable **global payroll system** supporting **5K+** employees across **multiple countries**, ensuring high **accuracy, compliance, and system reliability**.
- Implemented India payroll compliance logic including **Section 80C** and **Section 10(13A)**, **automating TDS calculations, employee declarations**, and **payroll deductions** within the backend processing engine.
- Developed bulk payroll processing workflows handling **600+** employee records per cycle, reducing manual processing effort by **80%** and improving execution time.
- Engineered high-performance bulk data processing pipelines using **MongoDB aggregation** and **Redis caching**, implementing **concurrency control** and **fault-tolerant** mechanisms to ensure reliable execution.
- Designed and built a **360° performance** evaluation system with **timezone-aware** scheduling to support seamless cross-region review cycles.
- Developed and managed complex, dynamic forms using **React.js** and **React Hook Form**, improving **validation handling, rendering performance**, and overall user experience.
- Built secure **RESTful APIs** using **Node.js** and **Express.js** with **role-based access control (RBAC)** and **JWT** authentication for enterprise-grade access management.
- Collaborated with cross-functional teams in an **Agile environment** to deliver production-ready features.

Technologies: React.js, Node.js, Express.js, MongoDB, TypeScript, Redis, RabbitMQ, PDFKit, Ag Grid, AWS, Git

Zummit Infolabs, Software Development Engineer Intern

05/2024 – 08/2024 | Bengaluru, India

- Developed a full stack booking and scheduling platform serving **500+ daily** active users.
- Built **RESTful APIs** and implemented secure **authentication** and **authorization** using **JWT**.
- Optimized **MongoDB** performance through **indexing** and **aggregation**, improving data retrieval speed by **150%**.
- Integrated Socket IO for real-time notifications and live updates.
- Collaborated with frontend and backend teams to deliver production-ready features in agile environment.

Tech Stack: React.js, Node.js, Express.js, MongoDB, Socket IO

EDUCATION

PES University, Bengaluru, Btech In Computer Science

2022 – 2025 | Bengaluru, India

Relevant Coursework: Data Structures, Operating Systems, Computer Networks, Machine Learning, Design and Analysis of Algorithms, Database Systems

Gujarat Technology university, Diploma In Information Technology

2019 – 2022 | Ahmedabad, India

Relevant Coursework: C, C++, JavaScript, Java, PHP, Data Structures and Algorithms, Computer Networks, web Security, Operating Systems.

SKILLS

Languages — Javascript, Typescript, Java, C++

Frontend — React.js, Redux, React Context APIs, React Hook Form, Material UI (MUI)

Backend — Node.js, Express.js, REST APIs, JWT, RBAC, Microservices

Database — MongoDB, MySQL, Redis

Cloud & DevOps — Nginx, RabbitMQ, AWS, Docker, Kubernetes, Linux

PROJECTS

IndiSign Innovative Hand Sign Recognition System

01/2024 – 05/2025

- Leading the development of IndiSign, a groundbreaking system for Indian Sign Language (ISL) that leverages **multi-sensor data** from **smartwatches**, including **accelerometers, gyroscopes, magnetometers**, and **barometers**.
- Utilized deep learning models such as Bidirectional **LSTM (BiLSTM)**, **meta-learning**, and **transformers** plane to achieve over **90% accuracy** in interpreting hand gestures and translating them into textual or auditory output.
- Created a **Wear OS** app to collect and analyze real-time hand movement data, enhancing data accuracy and system performance.
- Aims to revolutionize communication for individuals with hearing impairments by providing a non-intrusive and efficient solution, bridging the gap between the deaf community and wider society.

LANGUAGES

English — Professional Working Proficiency

Hindi — Full Professional Proficiency

Gujarati — Native or Bilingual Proficiency
